NORTH-HOLLAND

Author Index—Volume 64

Adkins, G., 101
Allen, R.H., 171
Arciszewski, T., 119
Ardayfio, D.D., 155

Clarke, D.W., Sr., 133
Coates, J.F., 121

Drake, D., 1

Gero, J.S., 183
Goldberg, D.E., 7

Haynes, K.E., 71

Kaner, M., 225
Karni, R., 225
Kijima, K., 39
Koh, A.-T., 85
Kulkarni, R.G., 71
Kumar, S.S., 261

Laxton, R., 55

Miyazaki, K., 39
Molitor, G.T.T., 271

Phillips, F., 1, 23

Schum, D.A., 209
Sriram, R.D., 171
Stough, R.R., 71
Strzalecki, A., 241

Terano, T., 13
Tuladhar, S.D., 23

Uduma, K., 197

Vincenzi, R., 101

Book Review Index—Volume 64

Fey, V.R., and E.I. Rivin, *The Science of Innovation: A Managerial Overview of the TRIZ Methodology* (Harold A. Linstone), 115

Subject Index—Volume 64

Artificial world modeling, 13
Ashby's Law of Requisite Variety, 23
Automobile industry
  innovation in, 155
  innovations in auto safety design, 197
  in Japan, analysis of changes under growing complexity, 39

Coin minting, effects of innovation on standardization, 171
Communities of practice (CoPs), modeling based on neural network concept, 71
Complex adaptive systems (CAS), (reports from conference)
  assessing organizational vitality, 101
  communities of practice (CoPs), modeling based on neural network concept, 71

Technological Forecasting and Social Change 64, 277–279(2000)

PII S0040-1625(00)00108-6

computer simulation technique to analyze social interactions in electronic-mediated groups, 13
conference summary, 1
genetic algorithms, connection with human innovation, 7
learning, knowledge creation, and creativity, 85
organization flexibility, model to measure, 23
technology management under growing complexity, 39
World Wide Web as a neural network, 55
Computational models for innovative and creative design, 183
Computer simulation
of organizational learning, 71
technique to analyze social interactions in electronic-mediated groups, 13
Computer-aided design (CAD) systems, effects of innovation on standardization, 171
Computer-related companies, study of flexibility/efficiency, 23
Conceptual design, teaching, 225
Creative design, *see* Innovation
Creativity
and learning in organizations, 85, 101
model, 241

Data Envelope Analysis (DEA), 23
Design innovation in product creation, 155
Directed Evolution (DE) and technological systems development, 133
Discovery and invention, teaching the processes of, 209

East Asian firms, assessment of learning, knowledge creation, and business creativity, 85
Economic change, prediction for new millennium (Perspective), 271
Education
changes needed, 121
discovery and invention, teaching, 209
service sector, teaching conceptual design in, 225
Electronic-mediated communication groups, computer simulation technique to analyze interactions, 13
Engineering design
future of, 121
teaching innovation, 209, 225

Flexibility, model to measure, 23

Genetic algorithms
connection with human innovation, 7
used in artificial world modeling, 13

Hebbian learning approach to organizational learning, 71
Hydraulic fluid systems, effects of innovation on standardization, 171

Innovation, connection with genetic algorithms, 7
Innovation in technology (special issue)
in auto safety design, 197
computational models for innovative and creative design, 183
course offering in discovery and invention, 209
design innovation in product creation, 155
Directed Evolution (DE) and technological systems development, 133
in engineering design, 121
introduction, 119
model of creativity, 241
role of standards in, 171
science-based innovation measurements, and links to policymaking, 261
service sector, teaching conceptual design in, 225

Japan
automobile industry, analysis of changes under growing complexity, 39
comparison of industrial R&D with U.S., 261

Leisure time, prediction for new millennium (Perspective), 271

Life sciences, prediction for new millennium (Perspective), 271

Mega-materials, prediction for new millennium (Perspective), 271

Neural network
concept used to model CoPs, 71
World Wide Web as a, 55
Neuroscience research, review and compared to development of World Wide Web, 55

Organizational creativity, literature review, 85
Organizational flexibility, model to measure, 23
Organizational learning, 71, 85
Organizational vitality, assessing, 101

Policymaking, innovation measurements and funding policies, 261
Predictions, forecast of new economic activity in new millennium (Perspective), 271
Product development, Directed Evolution method, 133
Psychological factors of creative design, 241

Safety, innovations in auto safety design, 197
Science-based innovation measurements, and links to policymaking, 261
Service sector, teaching conceptual design in, 225
Standards, role of in innovation in design and manufacturing, 171

Technology management under growing complexity, modeling, 39
TRURL computer simulation technique to analyze interactions, 13
Typewriter keyboard, effects of innovation on standardization, 171

Web site strategy, 55
Web-enabled marketing strategies, 55
World Wide Web as a neural network, 55
